FOR REGIONAL AND RURAL GP CLINICS IN VICTORIA

Rule 21 sorted. Fax gone.

Since 1 October 2026, every practice that uses My Health Record needs a written Security and Access Policy under Rule 21. We put it in place for you at a fixed fee, tighten the security basics, and replace fax with secure messaging inside the practice software you already use.

The package: one fixed fee, three things done

Rule 21 policy and access

We write your Security and Access Policy for you to review and adopt, set up individual logins and access logs, and start a staff training register.

Basic security, fixed

Two-step login on email and remote access, backups that are checked, and software updates that actually happen.

One fax-free automation

Referrals and results that now arrive by fax or email move to secure messaging inside the practice software you already use.

Pricing (all prices exclude GST)

Rule 21 and fax-free package

$3,500 + GST fixed fee

- Security and Access Policy written for your practice
- Individual logins, access logs and a training register
- Two-step login, backups and software updates
- One automation replacing fax or emailed referrals and results
- Handover, documentation and a staff walkthrough

For practices with up to about 10 staff. Larger practices are quoted after the free check.

Monthly care plan

$390 + GST per month, 12-month term

- Yearly staff training session, with the training register kept
- Compliance records and access reviews kept up to date
- Automated patient recall reminders, set up and monitored
- Small fixes and questions answered

Starts after the package, so the work stays done.

Founding clinics: the first 3 clinics get the package for $2,900 + GST in return for a short testimonial and case study.

How it works

1. **Free 20-minute check.** A call to see where your practice stands on Rule 21, security and fax.
2. **Fixed quote.** A short written plan with the fixed price and dates, before any work starts.
3. **Set up.** Usually two to four weeks, done remotely and around your clinic hours.
4. **Hand over and keep current.** Documents, a staff walkthrough, then the monthly plan if you want it.

Privacy and trust

- **No patient records needed to start.** We work on policies, accounts and settings.
- **Inside the software you already use.** Secure messaging and access controls are set up in your existing practice software and providers, not a new system to learn.
- **Privacy first.** We work to the Australian Privacy Principles, and anything we set up keeps data in Australia.
- **You stay in control.** We write the policy for you to review and adopt.
